WARMEST OF EMOTIONS

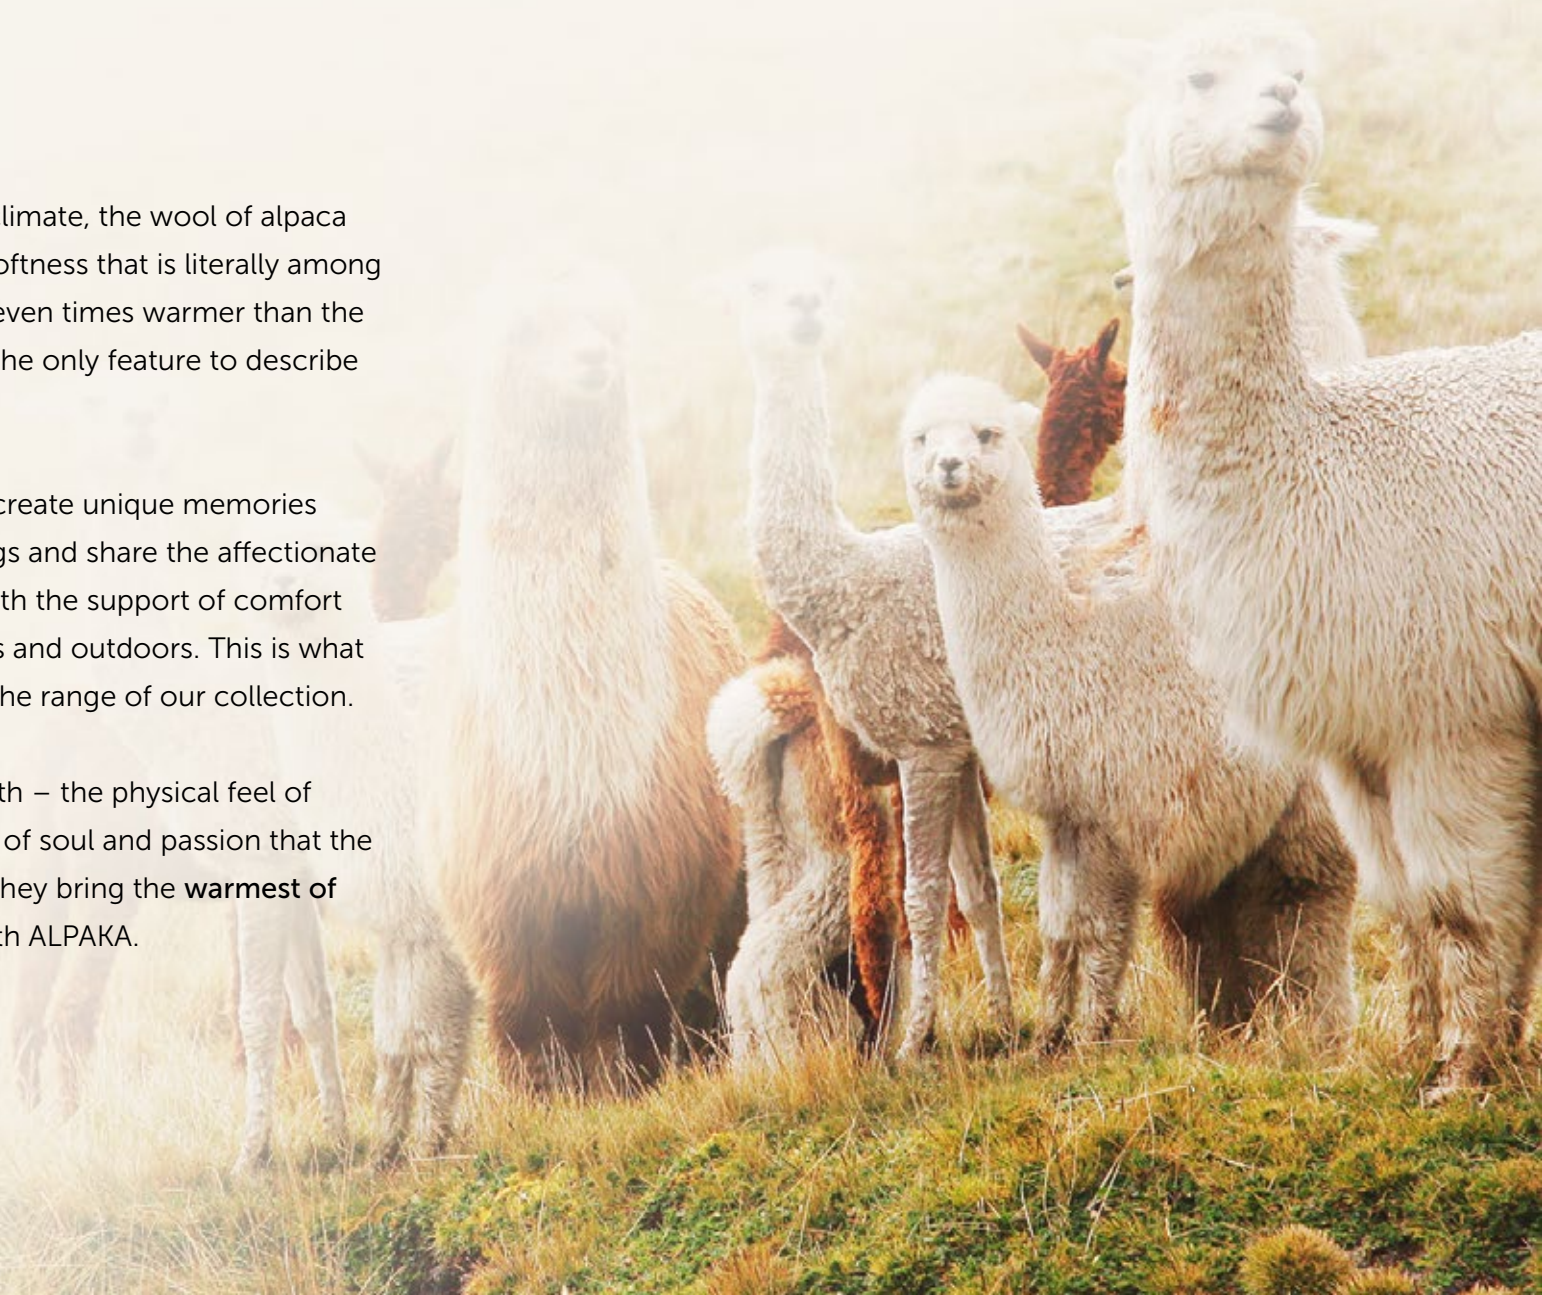

FUR & WOOL COLLECTIONS 2016-2017

EMBRACE THE WARMEST
OF EMOTIONS

Shaped by the extraordinarily tough climate, the wool of alpaca has a quality of natural warmth and softness that is literally among the superior in the world. It is up to seven times warmer than the wool of sheep. The essence, yet not the only feature to describe our products.

Mostly exclusively handcrafted, they create unique memories over time. They appeal to your feelings and share the affectionate moments in your life. Always there with the support of comfort and softness. Time and again, indoors and outdoors. This is what we are fortunate to offer you across the range of our collection.

Ultimately it is the combination of both – the physical feel of these natural materials and the sense of soul and passion that the created products embody. Together they bring the **warmest of emotions** that you will experience with ALPAKA.

A legacy from the Peruvian highlands, designed and interpreted in the Nordic Country of Estonia. The products of ALPAKA combine the culture, history and experiences of these countries from both hemispheres of the globe. It becomes especially evident with the top of the line of our collection – ALPAKA fur products.

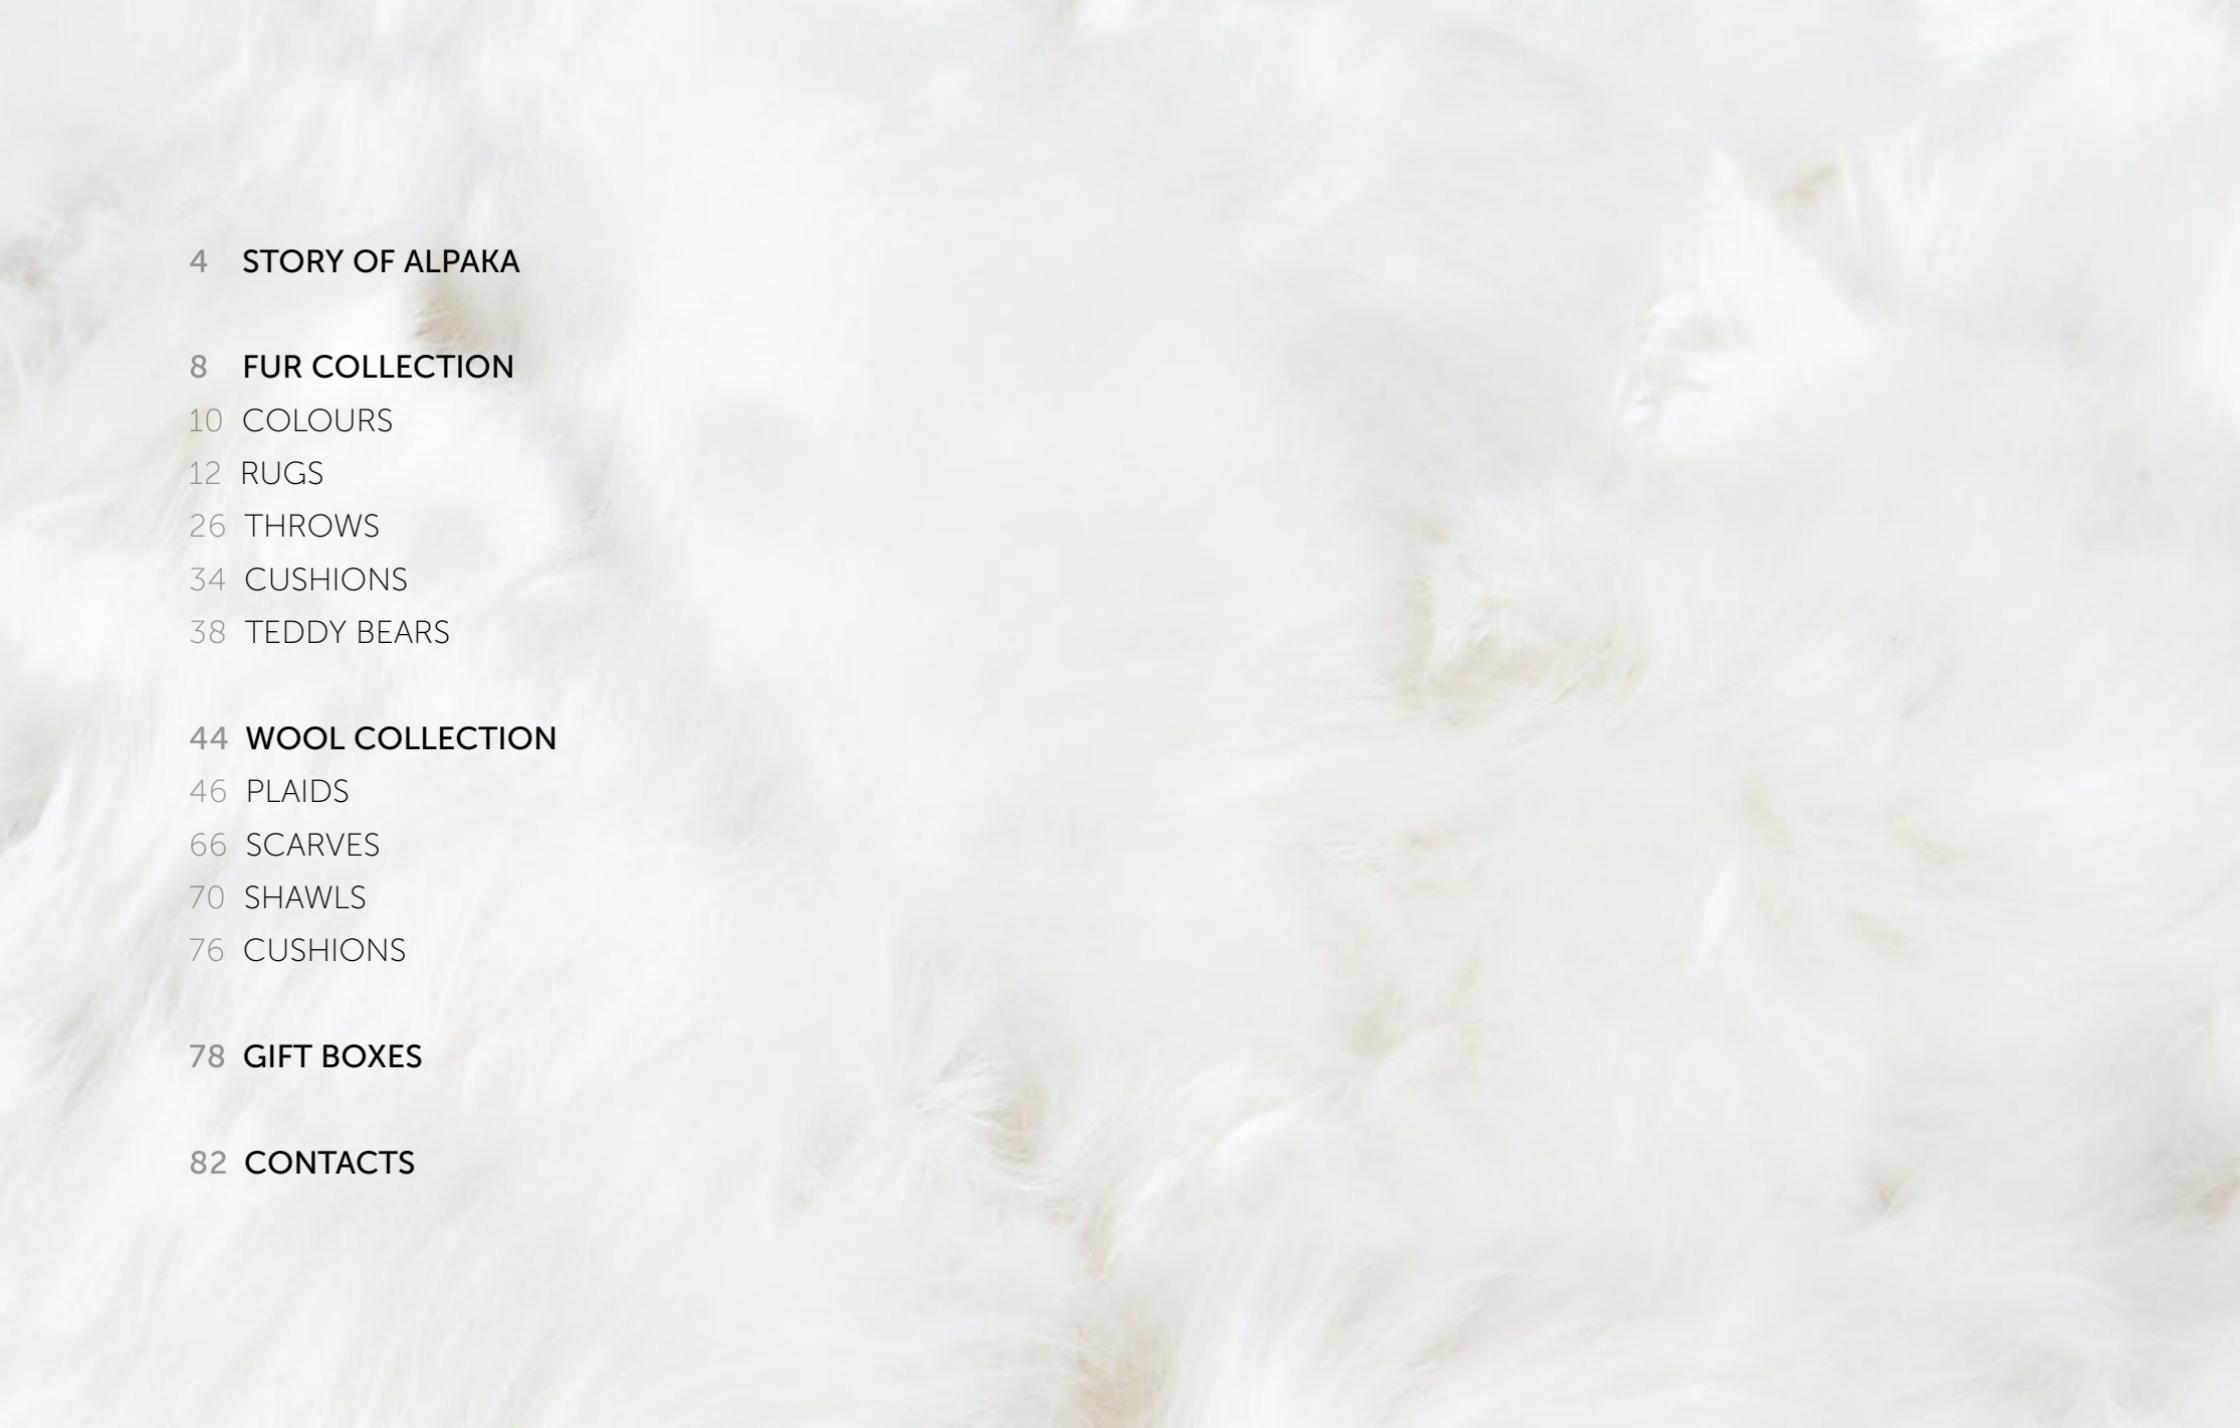

Handpicking only the finest, we source the alpaca material in person from Peru. Communities of tanners from around Lake Titicaca then apply time-honoured craft techniques, to ensure that wool and skins are processed in a proven traditional way, meeting the highest quality standards.

We bring the unfinished products from across the world to Estonia – a country, where craftsmanship and perception of beauty go hand in hand with modern thinking and inventiveness. With an ancestry and passion of Nordic design excellence, it is here that the pieces are fashioned into special and individual final products.

The background of the image is a close-up, high-resolution texture of dark brown fur. The fur has a wavy, shaggy appearance with varying shades of brown, from deep chocolate to almost black tones, creating a rich, tactile visual effect.

FUR COLLECTION

ALPAKA fur collection is the cornerstone of the ALPAKA brand and products. The fur collection features rugs, bedcovers, throws, cushions and teddy bears, and we can also make custom made products.

Alpaca fur is an exclusive material with unique qualities. It's extremely soft, silky and warm, and it will last for a very long time if looked after properly. Alpaca fur does not contain any lanolin, making all our alpaca rugs and other products naturally allergy-free. We specialise in custom made alpaca fur rugs, and we use special anti-slip backing and genuine leather bordering in all our fur rugs to make them more solid and durable. No animals are killed because of the fur, all alpacas have died because of the harsh climate conditions and extreme temperature fluctuations in the mountains, reaching up to more than 40 degrees celsius.

Slight variations and differences in the colours and shades of the rugs are a feature of the unique natural style, giving a natural and beautiful appearance to fur products, even when they have been dyed.

10

COLOURS

ALPAKA Fur Collection offers a wide range of colours - both natural and dyed colours - please see the colour chart here for colour availability. For special custom made colours, please contact ALPAKA. Each ALPAKA fur product has a unique appearance, both in terms of colour variations and the physical qualities of the alpaca fur. Small differences in colour shades and fibre length can occur, as only natural materials have been used.

RUGS

YAKU COLLECTION RUGS

13

Yaku Rugs are made of the longest and silkiest of the alpaca furs. Yaku means water in the South-American quechua language and a Yaku Rug holds a cushion of soft air in the fur, making it feel like a gentle breeze is blowing under your footsteps when you step on the rug. All natural ALPAKA Yaku Rugs reflect light in a beautiful and surprising way, creating a stunning individual signature for any interior design.

MATERIAL

Natural alpaca fur

SIZES

60x140, 70x150, 120x140, 140x210, 180x240, 210x300 cm and custom made

WEIGHT

~1900 g/m²

BACKING

Special anti-slip backing and leather bordering used for more solid and durable rug

STUFFING

Special softening layer of mattress between the alpaca fur and anti-slip backing

INTI COLLECTION RUGS

19

Inti Rugs are made of natural alpaca fur, which has very short, soft and silky fibres. Inti means sun in quechua and the Inti Rugs are the most exclusive of our three fur collections. This natural rug is the gentlest and most luxurious to the touch, taking you into a whole new world of comfort and pleasure.

MATERIAL

Natural alpaca fur

FUR TRIM THROWS

NEW

33

Fur Trim Throws are made of 100% baby alpaca wool, trimmed with natural alpaca fur. The fur has been selected carefully to be the longest and silkiest of alpaca furs. We use Yaku furs for this product - Yaku means water in quechua and it holds a cushion of soft air inside the fur, making it feel like a gentle breeze is blowing inside it. These throws can be used as fashion or interior design accessories.

WOOL COLLECTION

The ALPAKA wool collection features plaids, scarves and shawls made of extremely soft and silky alpaca wool. Plaids and scarves from our collection will keep you warm and cosy during the cold seasons of the year and give you luxury and comfort in those special moments you take just for yourself. These beautiful and warm products combine modern and traditional designs and different weaving and knitting techniques with the unique characteristics of this wool to keep you warm on the inside and radiant to the outside.

Alpaca wool is naturally curly and the fibres have microscopic holes in them that provide superior insulation and breathability. This allows even the thinnest and lightest plaids made of alpaca to trap the warmth very efficiently – our ALPAKA products will keep you warm when it is cold and keep you cool when it is hot.

Alpaca wool contains no lanolin and is naturally dirt repellent, making it the only naturally hypoallergenic wool in the world. You will always feel warm and safe when wrapped in alpaca wool. Alpaca wool has minimal pilling as the alpaca fibres are so smooth, so our plaids, shawls and scarves will keep their beautiful appearance for many years.

All these unique characteristics of alpaca wool, its softness, smoothness, silkiness, curliness and ability to repel dirt, make it one of the most desirable natural fibres in the world. In our products we use both baby alpaca and alpaca wool. Baby alpaca is considered the best natural fibre in the world, warm, soft, silky and durable. Baby alpaca wool is cut from the animal for the first time at the age of 2-3 years, when the fibre is at its finest and its highest quality.

With regular shearing over the years, alpaca fibre starts to get thicker and stronger, but it does not lose its silkiness and softness, meaning products made of alpaca wool are still majestic and are even more durable.

46

PLAIDS

PLAID CLASSIC

The Classic Plaid has wool and some synthetic fibres added to the alpaca wool to give it even more durability. The alpaca fibre gives it its softness, silkiness and warmth, while the mix of sheep wool and synthetic fibres makes it more affordable, spreading the luxury further. Its large size means that this plaid can also be used as a blanket on a bed or outdoors. It comes in a wide range of colours with beautiful natural tones.
